University of Zagreb, School of Dental Medicine

Uvod

Časopis *Acta stomatologica Croatica* bez prestantka se tiska od godine 1966., pa 2006. proslavlja mo 40. obljetnicu izlaženja. Prvih dvadeset godina časopisa prigodno je sažeto u dodatku Bibliografija (1986.; svezak 20.). Četrdeseta obljetnica nova je prigoda i čast za Uredništvo da predstavi publicističke aktivnosti naših i stranih stomatologa koji su imali povjerenja u časopis i tiskali u njemu svoje radove. Zato je Uredništvo odlučilo objaviti drugu Bibliografiju *Acta stomatologica Croatica* za razdoblje od godine 1987. do 2006.

Časopis *Acta stomatologica Croatica* od početka izdaju Stomatološki fakultet Sveučilišta u Zagrebu i Hrvatsko stomatološko društvo Hrvatskoga liječničkog zbora. U njemu se obrađuju aktualne stomatološke teme, tako da je časopis svojevrsno zrcalo struke. Svojom kvalitetom stalno pridonosi ugledu struke u zemlji, ali i ugledu hrvatske stomatologije u svijetu. Objavljivanjem članaka i na engleskome jeziku, povećala se pristupačnost časopisa u svjetskoj znanstvenoj zajednici. Svi članci u Bibliografiji su recenzirani.

Od prve godine izlaženja, periodičnost časopisa nije se mijenjala i svake se godine tiskaju četiri sveščića u jednom svesku. Konceptcija se tijekom godina mijenjala. Objavljuju se uvodnici, izvorni znanstveni radovi, priopćenja, pregledni i stručni radovi, kongresni sažeci te prikazi slučaja obuhvaćeni Bibliografijom.

Introduction

The journal *Acta stomatologica Croatica* has been published continuously since 1966. In the year 2006 we are marking the publication of 40 volumes. The first 20 years of the journal have been adequately marked and summarized with the supplement *Bibliography* (1986; vol. 20). The 40th anniversary of the journal is a new opportunity and honour for summing up the publishing activities of Croatian and foreign dentists who have shown their trust to the journal by applying their papers. Therefore, the Editorial board has decided to publish the second bibliography of *Acta stomatologica Croatica* for the period from 1987 until 2006.

From the very beginning *Acta stomatologica Croatica* was being published by the School of Dental Medicine in Zagreb and the Croatian Dental Society of the Croatian Medical Association. *Acta* covers current topics in the field of dentistry. Therefore the journal reflects the profession. By its quality the journal contributes to the good reputation of the dental profession nationwide, as well as to the reputation of Croatian dentistry worldwide. Since the articles are being published in English, the journal has become more accessible to the worldwide scientific community. All of the articles covered by this bibliography have been peer-reviewed.

Since the first year of publishing, the periodicity has not changed – four issues are published per yearly volume.

Zadnja rubrika svakog broja često je mijenjala ime, a sadržava vijesti, prikaze knjiga, referate, povijesne prikaze, zanimljivosti iz prakse, pisma uredniku, obavijesti, tekstove «in memoriam», najave kongresa i dr. U Bibliografiju su uključeni prilozi s trajnijim sadržajima važnima za stomatološku struku kao što su referati, povijesni prikazi i tekstovi «in memoriam».

Struktura bibliografije

Građa Bibliografije raspoređena je u četiri dijela. U prvom je dijelu popis objavljenih radova po kronološkom redu, drugi dio čini autorsko kazalo, treći dio sadržava predmetno kazalo na hrvatskome, a četvrti predmetno kazalo na engleskom jeziku.

O popisu objavljenih radova

Podaci o bibliografskim jedinicama preuzeti su *de visu* iz izvornika, bez dopuna i/ili ispravaka. Bibliografski opis svakog članka ili priloga sadržava ime/inicijale i prezime autora, izvorni naslov, godinu izdanja, svezak, sveščić te prvu i posljednju stranicu rada. Numerički podaci navedeni su prema Zahtjevima za pripremu rukopisa u biomedicinskim časopisima Međunarodnog odbora za urednike medicinskih časopisa tj. International Committee of Medical Journal Editors (ICMJE) (<http://www.icmje.org/>).

Radovi su se objavljivali jednojezično (na hrvatskome ili engleskom jeziku) ili dvojezično – u skladu s promjenama uredničke politike. Tako imamo tri varijante:

1. cijeli je rad objavljen dvojezično;
2. rad je objavljen na jednom jeziku, a naslov preveden na drugi jezik;
3. rad je objavljen na jednom jeziku, a naslov nije preveden na drugi jezik.

Popis radova raspoređen je u tri stupca. U prvo je redni broj rada, drugi sadržava bibliografske podatke na hrvatskome, a treći na engleskome jeziku. Imena autora otisnuta su kurzivom i masnim slovima u stupcu/stupcima jezika rada. Ako je naslov rada preveden na drugi jezik, u tom stupcu je tiskana bilješka: Naslov preveden ili Title translated. Ako naslov nije preveden, u stupcu drugog jezika je bilješka: Naslov i članak nisu prevedeni, to jest Title and article were not translated.

The concept of the journal has varied throughout the years. Editorials, original scientific papers, preliminary communications, reviews, professional papers, congress summaries and case reports are included in this bibliography.

The last column of each issue has often changed its title. It included news, book reviews, conference reports, professional information of interest, letters to the editor, notices, in memoriam, conference announcements etc. The bibliography includes contributions containing information of permanent significance to the dental profession, such as reports, historic overviews and in memoriam.

The structure of the bibliography

The material of the bibliography is arranged into four sections. The first section gives a list of published papers in chronological order, the second gives the author index, the third subject index in Croatian and the fourth section gives subject index in English.

About the list of published papers

The information about the bibliographic entries are taken *de visu* from the original without additions and/or corrections being made. The bibliographic description of each article or contribution consists of the author's forename/initial and the surname, main title, publishing year, volume, issue, first and last page of the paper. The numerical data is cited according to the Uniform Requirements for Manuscripts Submitted to Biomedical Journals of the International Committee of Medical Journal Editors (<http://www.icmje.org/>).

The papers have been published monolingually (in Croatian or English) and bilingually, according to the changes of the editing policy. Hence we have three versions:

1. entire paper published bilingually
2. paper published in one language, title translated into the other language
3. paper published in one language, title was not translated into the other language

The list of papers is arranged into three columns. The first column gives the ordinal number of the paper, the second bibliographic data in Croatian and the third column provides bibliographic data in English.

The names of the authors are printed in italics and bold in the column/columns of the language of the paper. When a title of the paper is translated into the other language, that column has a note: Title translated. If the title is not translated, the column of the other language bears a note: Title and article were not translated.

O autorskom kazalu

Autori su uvršteni abecednim redom prema prezimenu autora, a njihovi radovi kronološkim slijedom. Inicijali imena autora razriješeni su gdje je bilo moguće. Različiti oblici imena autora koji se pojavljuju u izvorniku riješeni su u skladu s općim uputama prema prihvaćenom obliku imena te su na taj način svi radovi istog autora svrstani uz jedinstveno prihvaćeno ime autora. Brojevi u autorskom kazalu označavaju redni broj bibliografske jedinice u popisu radova, a u slučajevima višestrukog autorstva, podaci o radu ponavljaju se uz prezime svakog suautora. Broj iza imena autora označava redni broj rada u kronološkom popisu.

O predmetnom kazalu na engleskom jeziku

Za predmetnu obradu korišten je kontrolirani rječnik pojmova National Library of Medicine – MeSH tezaurus (Medical Subject Headings) (<http://www.nlm.nih.gov/mesh/MBrowser.html>).

Svakom radu pridružena je glavna predmetnica i jedna ili više sporednih predmetnica. Za detaljnije podatke o sadržaju rada, predmetnicama su pridružene podpredmetnice. U slučajevima kada je predmet rada osoba, korištene su ne-MeSH predmetnice. Broj u zagradi naveden iza predmetnice upućuje nas na redni broj istog pojma u hrvatskom kazalu. Brojevi nakon grafičkog simbola označavaju redni broj bibliografske jedinice iz popisa radova čiji sadržaj odgovara određenom predmetu.

O predmetnom kazalu na hrvatskom jeziku

Sve predmetnice, tj. pojmovi navedeni u engleskom kazalu, prevedeni su na hrvatski jezik i dodani su im redni brojevi bibliografskih jedinica iz popisa radova čiji sadržaj odgovara određenom predmetu.

Zahvale

U pripremi Bibliografije znatno nam je pomoglo nekoliko osoba. Zato zahvaljujemo kolegici Heleni Markulin iz Središnje medicinske knjižnice Medicinskog fakulteta na bibliografskim podacima iz baze Biomedicina Croatica, kolegici Jadranki Stojanovski iz Knjižnice Instituta “Ruđer Bošković” na dopuštenju da preuzmemo dio podataka iz Hrvatske znanstvene bibliografije i dr. stom. Ivani Borčić na pedantnom popunjavanju podataka o radovima koje nisu sadržavale te dvije baze podataka, a objavljeni su u časopisu *Acta stomatologica Croatica*.

About the author's index

The names of the authors are arranged alphabetically by the author's surname. The initials of the authors are solved when possible. Different forms of the author's name that appear in the original have been solved by a cross-reference according to the adopted form of the name. That way all the papers of an author are gathered under the uniform name of the author. In cases of multiple authorship, the information about the paper is repeated under the surnames of each of the co-authors. The number following the name of the author marks the order number in the chronological list.

About the subject index in English

A controlled dictionary of terms of the National Library of Medicine – MeSH Browser has been used for subject analysis (<http://www.nlm.nih.gov/mesh/MBrowser.html>).

Each paper has been assigned by a main subject heading and one or more subject subheadings. For more detailed information about the paper contents, subject subheadings are added to the subject headings. In cases when the subject of the paper is a person, non-MeSH subject headings have been used. The number in a bracket following the subject heading refers to the ordinal number of the same term in the Croatian index. The numbers following a graphic symbol refer to the ordinal number of the bibliographic entry from the list of the papers whose content matches a specific subject.

About the subject index in Croatian

All the subject headings i.e. terms used in English index have been translated in Croatian.

Acknowledgement

Several persons have given their significant help during the preparation of the bibliography. Therefore we would like to thank our colleague Helena Markulin from the Central Medical Library of the School of Medicine, University of Zagreb for delivering bibliographic data from the Biomedicina Croatica database; a colleague Jadranka Stojanovski from the “Ruđer Bošković” Institute Library for the permission for using part of the data from the Croatian Scientific Bibliography and to DMD Ivana Borčić for her methodical filling the data about the papers published in *Acta stomatologica Croatica* but were not included in the previously mentioned two databases.
